

The best idea challenge

Objective:

- Personality development
 - Inter personal skills
 - Presentation skills (Guidance will be provided to the winning team)
 - Power point presentation skills (Guidance will be provided to the winning team)
 - Team spirit – realize we are into sciences not arts
- Technical(Students are supposed to check with IS/CS counterparts):
 - Software engineering (A dedicated subject in IS/CS) – Software Development Life Cycle(SDLC)
 - Requirement specification, Brainstorming, Planning, feasibility studies (SDLC)
 - Prerequisite for High level designing
- Deadline :**10PM, Sunday**
- Winners advantage
 - Work on a live project
 - Goodies worth INR 500
 - 200 reward points

The challenge:

1. Every team is eligible
2. 3 ideas at max will be accepted by a team.
3. Strictly, 1 submission mail should be sent to Chetan by **10PM, Sunday**. If more than 1 mail is sent only the first mail received will be considered. If more than 2 mails are received the team will be disqualified
4. The team coming up with best idea will be declared winners
5. Winners will be rewarded with goodies. Team will be rewarded with 200 reward points
6. The winners will be working on the proposed idea along with the shortlisted candidates and the project will be available for users in the department
7. Team members are supposed to **discuss with the staff in the department** while conceiving the ideas
8. Feasibility study of the idea for the implementation should be done before submission. Otherwise, the idea will not be considered
9. In the submission mail, Just mention:
 - a. Name of the idea/software application
 - b. Target audience or end users
 - c. Abstract of the idea in 8-15 sentences
10. Proposed idea could be a software application for
 - a. Teaching and non-teaching staff of the telecom department.
For ex: Continuous evaluation reporting system- The results of internals and tests answered by students should be seamlessly shared with their parents in an email
Or

#Confidential

- b. Students
For Ex: A forum/website to brainstorm and exchange ideas – Students provide their portfolio, dream com, their interests, courses they wish to take from external people etc.
- c. Student – staff interaction
For Ex: Mutual feedback system – for betterment of teaching and higher involvement of students in engineering
- d. Others
For ex: Central Information system – A website where details of students is maintained. If recruitment by a company “ABC” is happening next week, one should be able to find details of alumni students working at “ABC”
Or any other similar applications that can be used in the college campus

For any queries, reach out to Chetan.
